Re: Structural and Landscape Pests

Controlling structural and landscape pests with pesticides can pose risks to people, property, and the environment. It is therefore the policy of this Dumas ISD to incorporate Integrated Pest Management procedures for the control of structural and landscape pests.

In accordance with the Texas Department of Agriculture, Dumas ISD works diligently to adhere to all state pesticide regulations. Dumas ISD has a policy management statement that is available for your review. This policy can be obtained from the Operations Department at 411 Miller Avenue.

If chemicals are to be used in district facilities, time and date notifications will be posted at the facility. All applicators are trained and licensed by the State of Texas. Types of chemicals and the type of application vary from time to time and this information is available by request.

If you have any questions concerning the above information please call me at 806-935-4710.

Bobby Martindale
